The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 11, 20 and 33 (and their dependent claims particularly claims 3, 9, 15, 17, 24, 26, 36 and 38) are confusing and unclear when compared to the Table found on page 14 of the instant application disclosure of HMP of 1-10 weight percent and LMP of 1-33 weight percent and the independent claims 2-43 weight percent petroleum waxes which differ from the dependent claims HMP of 1-32 weight percent and LMP 1-10 weight percent which total 2-32 weight percent. It is unclear from the record which weight percent is intended. Clarification is requested.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-39 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Admitted Prior Art and Johnson et al (Johnson) 6,214,918 B1.

Johnson teaches candle compositions and candles with a wick, and a candle placed into a container, note the abstract, column 1, line 16 to column 2, lines 1-24 and claims 1-17. Applicants make admission on record that the Admitted Prior Art, U.S. Patents 2,825,635; 3,046,101; 3,216,921; 4,855,098, found on pages 3 and 4 of the

Art Unit: 1714

instant application, teaches that known mixture of paraffin waxes have been used in candle compositions having different melting points as taught by Johnson. The Admitted Prior Art U.S. Patent 2,159,218 found on page 2 of the instant application, teach that cottonseed oil is added to paraffin wax up to 5 weight percent of the paraffin to improve opaque appearance of the wax and thus anticipates the instant candle composition, candles with a wick, and containers with candles.

The prior art cited but not applied further teach candles and candle composition components, as well as containers with candles of the same nature as claimed by applicants.
